

Testimonials

Rick I can't compliment you enough on the work you did at my club. The dance cages are a huge hit they have become the most popular part of the night club. We had tried a stripper pole and even tried calling it a dance pole, but the girls still found it too intimidating. People are lining up to get in the dance cages. So far looks like our limit is 6 people at a time. The cages are sturdy enough to hold that many people and probably more if we could fit more in them....Thanks again for working with us on the specialty lighting we wanted for the cages and for working around our schedule for installation. Everything was finished just in time for our grand reopening. I was looking at the pictures of your rectangular dance cages. We have another area that would work great for 1 of them and I can tell by the interest we are definitely going to need to add on. People have been raving about the cages and being able to sit at barstools around the cage dancers..... Thanks again great job
